P. O. BOX 418

NEW BRAUNFELS, TEXAS

Dear Mr. and Mrs. Friend Customer

Please do us the honor of accepting this catalog, and with it our cordial invitation to visit our nursery, next to famous and picturesque Landa Park in New Braunfels.

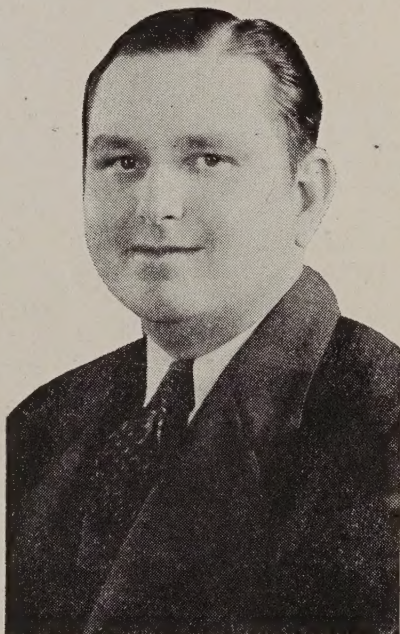

Study this carefully, for it will suggest many items which will make your grounds more beautiful and your orchards more fruitful and profitable.

When you order from this catalog, you are ordering quality, not only in the old familiar plants, but, as you will see, in many new and interesting plants which we have introduced in recent years. We hope they will bring pleasure to the plant and flower lovers of the Southwest.

That you will appreciate the superiority of our plants is our sincere belief, for skilled propagators, favorable climate and rich soil are here combined to produce fine, hardy and highly satisfactory specimens.

It will be our pleasure to consult with you at any time concerning your landscaping, horticultural, and floral needs, for your convenience, we solicit your correspondence.

We wish that we could visit with each one of you personally, but under present conditions this is impossible. Therefore, we hope that you look upon the receipt of this catalog as a personal visit from our organization.

When you are in New Braunfels, come in and see our Nursery and Gardens.

Very truly yours,

NEW BRAUNFELS NURSERY
& FLORAL CO., INC.

Howard W. Locke, Mgr.

Buying and Planting for Your Pleasure and Profit

The many different varieties of trees, shrubs, roses, plants and vines that are listed in this catalog are offered with our pledge that your orders will be filled with care and dispatch and your demands will be satisfied in every possible way. "Buying and Planting for Your Pleasure and Profit" is definitely assured here.

Howard W. Locke, present manager of the nursery and landscape service, graduated from Texas A. & M. College, and furthered his horticultural and landscaping knowledge through his experience with the Alabama Park Service, The Texas State Highway Department, and the National Forest Service.

Thekla F. Locke, who has had many years' experience in designing floral offerings and in greenhouse management, is in direct charge of the floral shop and greenhouses. Her creations have been acclaimed throughout the State. This department is a member of Florist Telegraph Delivery.

Our nursery is located next to Landa Park, one mile west of the Comal County courthouse at New Braunfels, Texas. Service to and from New Braunfels by parcel post, motor express or freight, express and freight is the best and permits us to make our deliveries promptly. We have no connection with any other nursery and respectfully solicit your orders and inquiries.

When and How to Order

Place your order as soon as a decision has been reached so that we may reserve the stock you order.

Every year we are applying new methods to facilitate year-round handling, but the shipping season usually runs to May 1. Orders that can conveniently move via motor truck may be delivered at any time. While we appreciate personal visits, if that is inconvenient, send in your order by mail on the Order Blank which is enclosed for your convenience.

USE OF THE ORDER BLANK: Fill in the Order Blank in complete detail, as that will facilitate handling your order. Write or print your name and full address plainly. List your items by name, giving quantity and prices. Any other matter should be written on a separate sheet of paper.

TERMS: Our terms are Cash With Order unless previous credit has been established or sufficient time is allowed to investigate credit rating.

PRICES: The prices listed herein are Net, f. o. b., New Braunfels, Texas, except as noted and supersede all previous prices and are subject to change without notice.

Twelve of a variety may be had at the price of ten; larger quantities quoted on request.

No charge is made for local deliveries, but on all shipments the purchaser pays the carrying charges.

Small items that are limited to 100 inches, length and girth combined, and to 70 pounds in weight, may be shipped by Parcel Post and if you wish shipment that way add 10 per cent to cover postage. For

shipments up to 300 pounds and all shipments requiring quick delivery, Express is most satisfactory. For very large and heavy shipments, and for shipments that do not require quick delivery, Freight is satisfactory. Express and Freight shipments are sent "Charges Collect." Give explicit shipping instructions, otherwise we will exercise our best judgment.

PACKING: No charge is made for packing except on a few bulky items and on deciduous stock handled during the summer which must be balled and burlapped. Packing on these will be charged at cost.

REMITTANCE: Make your remittances payable to NEW BRAUNFELS NURSERY & FLORAL COMPANY. The best way to send them is by Bank Draft, Express Money Order, Post Office Money Order. Money should be sent by registered mail. Checks will be accepted from responsible parties.

The success of your plants depends on the care given them. Treat them well and confer with us often regarding their care. We want them to grow and thrive for you and will give all of the assistance you ask for.

CLAIMS: We ship only first class stock, "True to Name," that meets specifications. Any errors will be gladly corrected. All claims, except for "trueness to name," must be made in writing within five days after receipt of shipment. As all shipments are in good condition and properly packed when delivered to public carriers, our responsibility ceases there. Shipments then move at purchaser's risk and claims for damages must be made to the transportation company.

5 in. pots—12 in. plants	each	.35
3 for \$1.00		

THE HANDLING OF SHRUBS AND OTHER PLANTS

All shrubs, trees, and other plants that are obtained from nurseries are grown in two different ways; in the open ground, or in pots, tubs, or cans. Those grown in pots, tubs and cans are easily handled; if grown in open ground they are taken up, either bare rooted, or with earth about the roots. When they are dug with earth about the roots, they are called Balled and Burlapped.

POT GROWN PLANTS

Many varieties are grown in pots, tubs, or cans. These can be transplanted or shipped at any time of the year, and immediate planting effects can be accomplished.

BARE ROOTED (BR) PLANTS

These consist of plants taken from the open ground (where grown) with bare roots, usually handled during dormant winter season—from November to April, they are shipped without any soil on roots, but are well dipped in mud, and packed in wet straw for protection against exposure, and evaporation (drying out).

BALLED AND BURLAPPED (B&B) PLANTS

Are those that have been dug with the roots in place, in the original soil. Burlap is then tied around the ball of earth, and the plant should be carefully handled by the ball, rather than the tops (foliage) so as not to loosen the earth around the roots. Burlap should not be removed when plant is set out.

JUNIPER Pfitzers: Low spreading, blue green foliage, very attractive, evergreen.

15-18 in. plants—B. & B.	each	\$2.00
18-24 in. plants—B. & B.	each	3.00

ST. AUGUSTINE GRASS

“St. Augustine Grass has no equal as shade grass in Florida or on the coastal plain of the Southern States. It grows equally well in the sun or shade. If given plenty of water and nitrogen fertilizer, it will grow under practically all conditions in this section. Since seed is not available, lawns are started vegetatively.”

This beautiful grass remains a bright peagreen the year round, grows as well in the shade as in the sun and does away with dead grass or expensive rye grass sowing in the winter.

We furnish firm vigorous plants for your lawn at the following prices: **Runners**, \$1.00 per 100; \$7.50 per 1,000, and **Sod** at \$1.00 per square yard. We will furnish estimates for new lawns or renovations of old lawns.

LOQUAT: Evergreen plum: Medium height, evergreen tree or shrub, glossy, long, large leaves; flowers sweet and bloom in winter, creme color; bright yellow fruit in early spring. Fruit acid.

3-4 ft. plants—B. & B.each \$3.00

PECANS

The Pecan is a variety of tree that is able to acclimate itself to any condition, or climate, being hardy anywhere in the Southwest. Pecans are a proven, profitable, commercial crop, and also will be good insurance to prosperity. Some of the most neglected bottom lands are the best lands for fine pecan orchards. Plant nursery grown, grafted trees, as you will save time and money by doing this. These trees also make beautiful shade trees.

How to Plant Pecan Trees

First, prune each branch approximately one-third of original length. Plant two to three inches deeper than it stood in nursery to take care of shrinkage of new soil. Make hole two feet wide and as deep as the height of tree above ground up to five feet. If necessary, use auger to obtain full depth. Set tree and pack soil firmly and give it all the water it will take, adding more soil as it settles.

Water twice to three times weekly depending on weather, using sufficient water to reach bottom roots. If soil does not take water freely, bury a perforated gallon can near tree, fill with water which soil will

Pecan trees growing in our field .

slowly take up. In summer use mulch of straw, hay or Peat Moss at base of tree to help retain moisture. Also loosely wrap tree to first branch with paper to prevent sunburn.

Pecans usually grow in any soil, but the better the soil the better they grow and produce. Plant good pecans, give them proper care and sufficient water and you will be successful with them. You get out of them what you put into them.

NO CONNECTION WITH ANY OTHER NURSERY

DISTANCE FOR PLANTING PECANS

35 ft. by 35 ft. gives 35 trees per acre.
 35 ft. by 70 ft. gives 17 trees per acre.
 50 ft. by 50 ft. gives 16 trees per acre.
 60 ft. by 60 ft. gives 12 trees per acre.
 70 ft. by 70 ft. gives 9 trees per acre.

We desire to be as helpful as we can at all times. Write us for free, complete detailed information concerning the selection, planting and care of your nut trees, fruit trees, berry plants and grape vines.

Varieties as follows:

BURKETT—Round, thin-shelled, well filled nut, good flavor, good for West Texas.

DELMAS—Large, oblong, tapering nut, delicate flavor, medium shell, mature late, good for Central Texas.

MAHAN—Vigorous grower, early and prolific, giant size nuts, very thin shell, fine quality meat.

STUART—Good bearer, thick soft shell pecans, with sweet, brittle meat.

SUCCESS—Most popular Texas variety. Large oblong nut, plump smooth, kernels of good quality meat, prolific tree.

WESTERN SCHLEY—Regular bearing pecan. Soft shell, long white kernels, good in dry climates and high altitudes.

Write us if you desire other varieties not listed. We can supply others.

PEACHES

Peaches are regarded as the best fruit crop for the South. There are many large, successful peach orchards in Texas and you too can have fine peaches for home consumption or for commercial markets if you plant the varieties we have carefully selected because of their favorable habits and qualities. We will be glad to advise you in regard to the particular varieties that are best adapted to the various sections of Texas and the Southwest.

Do not plant peaches in chicken yards or poultry runs. Spray well for best results.

BELLE OF GEORGIA: Ripen June 25—Large, white early peach. Good shipper, freestone.

MAYFLOWER: Ripen May 25—Medium size fruit, white with red, freestone.

EARLY WHEELER: Ripen May 30—White with red cheek. Cling, good bearer.

CARMAN: Ripen July 1—Good commercial variety, large, white with red cheeks, semi-cling.

NURSERY CLOSED SUNDAYS

PALLAS: Ripen July 1—Medium size, white, sweet, heavy bearer, freestone. Improved honey type.

MAMIE ROSS: Ripen July 5—White red, semi-cling, heavy bearer. Large fruit, best white peach, reliable.

LEONA: Ripen July 10—Large, yellow, freestone, red cheeks, good in black heavy soils. Good commercial variety.

CHILOW: Ripen July 15—Large, cling, yellow with red, good flavor.

EARLY ELBERTA: Ripen July 1—Early ripening variety of Elberta peach. Same qualities as Elberta, but more hardy and prolific. Yellow freestone.

ELBERTA: July 15—Widely known yellow freestone. Large.

HALE HAVEN: Ripen June 25. Freestone, Beautiful yellow peach, good orchard variety, large fruit, heavy bearer.

J. H. HALE: Ripen July 15—Large, excellent flavor, yellow freestone, red cheek, good commercial variety.

FRANK: Ripen July 30—Best yellow cling. Large, sweet, firm, heavy bearer, good for pickling and canning. Every one should plant some of this fine variety.

BABCOCK: White, freestone, improved honey peach. Ripen July 15.

AUGBERTA: Ripen August 10—August ripening Elberta; large, yellow, freestone.

INDIAN CLING: Ripen August 5—Medium size, red meat, cling, good variety for table use.

SOUTHLAND: Sport of Halehaven, ripens about 16 days before Elberta peach or July 1st. Freestone, medium large, round light red blush, yellow meat, firm, good flavor, vigorous growth and good producer. Good peach for the South. Good for canning and frozen food.

DIXIRED: Ripens two weeks before Golden Jubilee peach, cling stone, medium-sized, round flesh yellow with red cheeks. Early peach, firm, good for shipping, does not require too cold winter.

DIXIGEM: Ripens June 15, Medium-sized, ovate, yellow flesh, semi-freestone, excellent flavor, firm flesh, early shipping variety prolific.

10 for \$7.50

YEW, PODOCARPUS: Recently introduced evergreen shrub. Slow, compact, growing upright shrub. Long, slender, dark green leaves.

\$2.00 per foot

EVERBLOOMING ROSES

Preparation of Rose Beds: 1. Remove grass, weeds or other plants for a width of 4 feet if a single row is to be planted; 6 feet wide if for 2 rows; 8 feet wide if for 3 rows. For convenience in tending and cutting of blooms, it is best to have not more than 3 rows together. For further planting, allow a walkway of about 5 feet to the next row or series of rows.

2. Dig a trench 12 to 15 inches deep and 2 feet wide for each row.

3. Place 3 to 5 inches of rotted manure (cattle preferred) in the bottom of the trench.

4. Add 2 to 3 inches of soil on top of the manure or enough so the lowest branches and the union with the understock will be just above the soil level when the planting is completed.

Setting Out the Bushes: 1. Soak the roots of the bushes in a tub of water for about an hour.

2. Trim the roots to not more than 12 inches long.

3. Prune the tops back to 6 or 8 inches from the union.

4. Place a mound of soil under the base of each bush so the roots slant downward into the trench. Cover the roots with soil

and pack slightly by tamping or tramping. Water if the soil is dry.

5. Bushes may be spaced as close as 18 inches apart in a row.

All roses should be planted during dormant (winter) season. Always prune your rose bushes on arrival, and after first frost, also later in the winter just before they leaf out. Be sure not to leave any dead or dry limbs.

AMI QUINARD: Blackish red.

BETTY UPRICHARD: Beautiful pink, two-tone flower with shades of copper. Hardy. Popular.

BRIARCLIFF: Pink, brilliant, perfect form. Sweet, cutting kind.

CALEDONIA: White, large, long pointed bud, good bloomer.

EDITOR McFARLAND: Choice dark pink, perfectly formed, deep rose-pink blooms, free bloomer.

E. G. HILL: Beautiful dazzling scarlet blooms deepening to pure red, fragrant and lasting, abundant foliage, long stems, free bloomer.

WRITE FOR TREES AND VARIETIES NOT LISTED

CONDESA DE SASTAGO: Color, two-tone.

ETOILE de HOLLAND: Immense ovid buds open into very double cupped blooms of intense, velvety red; very fragrant. Moderate grower and bloomer.

FRANCIS SCOTT KEY: Large double, rich crimson blooms borne on long stems; long lasting. Vigorous and healthy bush.

KAISERIN AUGUSTE VIKTORIA: Beautifully shaped white rose, well formed, creamy buds with snowy-white petals. Magnolia like fragrance.

LUXEMBOURG: An unsurpassed yellow rose. Long pointed buds, open very full, deep, bronze—yellow. Good and dependable.

GOLDEN OPHELIA: An excellent apricot-yellow rose. Hardy bush.

EDITH NELLIE PERKINS: Beautiful Apricot-pink rose.

GRENOBLE: A vigorous grower producing plenty of beautiful scarlet-crimson flowers on long, strong stems. Fine for cutting.

MRS. P. S. DuPONT: Fine yellow.

PRESIDENT HOOVER: Beautifully pointed buds, opening to large thick-petaled, broad blooms, multi-colored varying from coppery-red to cerise-pink and orange-yellow.

RADIANCE, RED: Deep rosy-red with all fine qualities of Radiance. Hardy, strong, vigorous bush.

RADIANCE, PINK: Universally favorite pink rose. Deep pink, blooms continuously.

POINSETTIA: Color, Christmas-red.

MRS. CHAS. BELL: Shell radiance color.

F. J. GROOTENDORST: Small, fringed flowers of bright red, in large clusters throughout the season.

TALISMAN: Sensational multi-colored rose. Exquisite, long and pointed buds, open into blooms of deep yellow with shadings of gold, scarlet, and rose.

RED TALISMAN: New, solid red.

YELLOW TALISMAN: New rich yellow.

F. K. DRUSCHKI: White.

AMERICAN BEAUTY: Heavy, Flower red.

POLYANTHA ROSES

The small growing, multi-flowered, bush roses that make beautiful specimens, rich colored hedges, borders and bright spots among shrub groups. They are long-blooming and cannot be excelled by any other flowering shrub for color and blooms.

CECILE BRUNNER: Sweetheart rose, clusters of small, perfectly shaped blooms of soft rose-pink tinged with salmon at base of petals. Very double flowers.

CHATILLON: Large clusters of medium, semi-double pink blooms. Good for hedges, borders, and color. Polyantha type, small growing.

EBLOUISSANT: Dainty, perfectly formed, miniature, double flowers like little rosettes, open to attractive cactus form. Growth rarely over 10 inches high.

IDEAL: Rich, dark scarlet blooms, compact bushes, baby rose, polyantha type, excellent for mass plantings.

GOLDEN SALMON (Salmon): Distinct, bright, pleasing orange-salmon blooms in large clusters. Best polyantha.

CLIMBING ROSES

Climbing Roses are suitable for training on fence, trellis, pergola, or porch for hiding unsightly objects, and as they grow larger, for background planting with Hybrid Teas. They require little pruning.

ETOILE de HOLLAND: Red, hardy, vigorous blooming, climbing rose.

PAUL'S SCARLET: Most popular red climber. Brilliant, scarlet, medium size blooms in sprays of five and ten, very attractive.

RED RADIANCE: Beautiful red prolific bloomer.

K. A. VIKTORIA: Hardy, white, climbing rose.

COLUMBIA: Beautiful pink, good heavy bloomer.

F. K. DRUSCHKI: Heavy bloomer, large white flowers; grows large.

CLIMBING PRESIDENT HOOVER: The famous President Hoover, with its multi-colored pink, red, yellow and buff flowers, is vigorous enough as a bush, but as a climber it grows all over the place, producing its beautiful flowers in great profusion, each one on a long stem, every bloom perfect in color and symmetry.

TALISMAN: Color the same as the bush Talisman, except that flower develops larger and more perfect than on the bush. Beautiful on trellis.

PRICES ON ROSE BUSHES: Both bush roses and climbing rose sell at the same prices which are as follows:

2 year old—No. 1 Rose Bushes, each 60c
12 for \$6.25; 6 for \$3.30

NURSERY CLOSED SUNDAYS

TREE ROSES

Climbing Rose

Tree-shaped roses differ from the bush roses in that standard well-known roses are budded into a stalk of some strong growing variety forming a bushy head at the top of a long stem.

Colors: Red, pink, white, yellow, and multi-colored red with yellow.

PRICES on Strong Tree Roses:
3-4 ft. plants—B. & B. each \$4.00

Landscaping Architecture Is the Art of Planting Beautifully

Beautiful surroundings as a setting for your home are just as essential as the interior decorative effects employed to bring out the beauty of its furnishings and appointments. They serve to complete the picture your home presents and should be well planned and correctly planted.

To accomplish this with best results, it is advisable to secure the advice and services of a competent Landscape Architect. Let him prepare a diagram showing the location and variety of every shade tree, shrub and flower, and lay out and design walks and other Landscape features that will reflect good taste and harmonize with the architecture of your structure. Such a plan should be made before any planting is done or, preferably, even before construction is started.

Howard W. Locke is in charge of our Landscape Department. He is well trained for his position as he holds a degree in Landscape Art from Texas A. & M. College and has had practical training with such organizations as the National Park Service, National Forest Service, and the Texas State Highway Department. Also in engineering department with Consolidated Steel Corp., Orange, during war, helping with war effort.

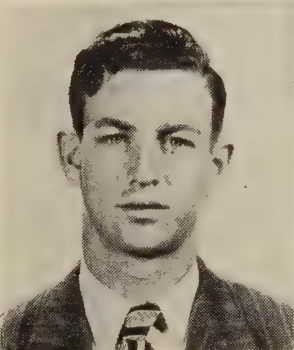

Under the direction of this man, our Landscape Department has completed many representative landscaping projects for parks, public grounds, large and small homes and private estates both in town and in the country, and this same service is offered to you. Our Landscape Department is maintained to serve you. It is not expensive to use and we cordially invite you to consult with us concerning all of your landscaping needs.

We have with us also Mr. Henry O. Maier, an experienced Nurseryman and Landscape Man, who has been with our firm many years. During the war years he was employed with the Army Air Forces at Kelly Field in charge of landscape maintenance work and greenhouses for this large air field.

Members of the F. T. D.

Through our affiliation with the Florists' Telegraph Delivery, we telegraph orders of flowers for delivery anywhere in the United States. This Department is in charge of Thekla F. Locke, Florist, who has spent thirty years in the ART of designing floral arrangements. Your orders for bouquets and corsages for parties and weddings, table decorations, funeral wreaths and sprays, and other designs appropriate for any occasion receive Mrs. Locke's personal attention and are respectfully solicited.

Raymond F. Katt, Office and Sales. Graduated from New Braunfels High School in class of 1945. In the class of '49 at Agricultural & Mechanical College of Texas. Served in United States Merchant Marine in 1946 and 1947.

FERTILIZERS

Every soil benefits from fertilizer, and it is essential for some soils. Although there are many excellent prepared fertilizers on the market, the best all-round fertilizer is well-rotted manure.

For tree planting, mix one part fertilizer to four parts of the soil used in filling the hole. As the tree grows, apply fertilizer farther and farther from the tree so it will reach the small roots. Work it well into soil. This may be done every year or so.

Commercial fertilizer should be used if ordinary manure fails to supply enough minerals for your soil. It is easy to control and will not produce weeds.

THE BEST KNOWN FERTILIZERS

ALUMINUM SULPHATE. Especially recommended for azaleas and camelias. Lb., 20c; 10 lbs. \$1.00.

BONE MEAL, FINE GROUND. Excellent general fertilizer; used for flower beds, garden and field crops and for top dressing for lawns and pastures. Lb., 10c \$6.00 per 100 pounds.

COPPERAS (Iron Sulphate). A wonderful tonic for sick plants. When they turn yellow, dissolve one pound in one gallon of water and pour around your plants. Restores green color. Lb., 10c; 10 lbs., 75c; \$3.50 per 100 lbs.

ZINC SULPHATE, for pecan rosette 20c per pound.

PEAT MOSS. Helps save fertility and moisture. Makes excellent prepared soil for small beds, window boxes, pots, etc. Prevents baking and cracking of soil. Lb., 10c; 10 lbs., 80c; bale, \$5.00.

VIGORO

The Square Meal that assures rich beauty in lawns and flowers. Lb., 10c; 6 lbs., 50c; 100 lbs., \$4.00.

INSECTICIDES

TREE PAINT. Use on fresh cut branches and after cavity borers in trees. Prevents rot and insect infestation. Quart, 1.60.

DUSTING SULPHUR. The standard dust-control for red spider, mildew, leaf-spot, and rust. Fine, non-clogging grade, ready oxidizer. 1-lb., 25c.

FREE INFORMATION

At any time, we will be happy to furnish you with free information upon inquiry. Simply write us, and outline your problem and we will assist you. Our plants are grown at our Nursery in "magic"-like soil. Irrigated with water from four heavy producing water wells, 20 feet deep, furnishing un-erding supply of water—fresh, cool, crystal clear for better plant growth.

Recommended for Mildew, Rust and Black Spot prevalent on Roses, and various other Fungus Infestations as well as for Aphis, Thrips and similar species of insect pests.

4 oz. Bottle 65c each. 8 oz. Bottle \$1.00 each.

RELIANCE AZALEA & CAMELLIA SPECIAL

Besides the recommended use as a Plant Food for Azaleas and Camellias, it is widely used for many other plants, including Gardenias, Rhododendrons, Hollies, Magnolias (all types), Osmanthus (including fragrans—Tea Olive), Dogwood, Hemlock and conifers in general, Live Oaks, Blueberries, Tuberous Begonias, Fuchsia, Roses, etc.

It is an excellent plant food for St. Augustine, Italian Rye, and Centipede lawn grasses, being a "natural" for Centipede as it contains critical elements needed by this grass.

PROPER FEEDING NECESSARY

For maximum growth, bloom, and general well-being, it is necessary to feed these shrubs properly. Unfortunately for the Azalea and Camellia grower, most commercial fertilizers are made neutral by the use of limestone, and are not suitable for these acid-loving plants. Likewise, to home-mix a proper fertilizer requires the purchase, in small quantities, and therefore at high cost, of a number of materials which are difficult to mix thoroughly.

It is with this in mind that we have prepared a balanced, complete plant-food for Azaleas and Camellias. We are con-

stantly studying the feeding of these plants with the idea in mind of making any changes in our fertilizer that definitely prove of value.

Reliance Azalea and Camellia Special is acid—easy to apply—has no objectionable odor. It can be purchased in small quantities or by the ton.

100 Pounds	\$5.00 each
25 Pounds	1.50 each
10 Pounds	.85 each
5 Pounds	.50 each

HYPONEX PLANT FOOD: Grows superior plants in soil, sand or water. Vitamin B1 added. 3 ounces make 18 gallons. 3oz. can 25c.
